

CONFLICT MINERALS

OUR POLICY

Versum Materials is concerned that the trade of Conflict Minerals - tantalum, tin, tungsten and gold (3TG) - mined in the Democratic Republic of the Congo (DRC), or adjoining countries, and other high-risk, conflict-affected areas around the world may be fueling human rights atrocities. As a result, we support the actions of governments and organizations to increase supply chain transparency and enable companies to source conflict-free 3TG. We seek to source any 3TG found in our products from suppliers that do not directly or indirectly finance armed conflict or human rights abuses in the DRC, adjoining countries or other high-risk, conflict-affected areas around the world.

We have evaluated the potential for 3TG to be part of our supply chain, and have reviewed our product lines and identified those that might contain these minerals. We undertake a good faith Reasonable Country of Origin Inquiry ("RCOI") for each of our covered products.

We expect our suppliers to commit to strive for conflict free sourcing. Likewise, we support industry efforts such as the Conflict Free Sourcing Initiative (CFSI) to enable companies to source conflict-free 3TG. We apply our policy by following OECD guidelines, investigating our supply chain by engaging with our suppliers and asking them to adhere to and enforce the same standards. We expect our suppliers to engage in due diligence, to identify the source of products and components supplied to us, and seek to source from conflict free suppliers of 3TG.

Versum will address any concerns about or potential violations of this policy, which can be reported through our [IntegrityLine](#).
